

CLEANLAMT

Vehicle and Automatic Transmission Control Unit VTCUs

CPU

Infineon TC297,
Main Frequency 300MHZ,
Flash 8M

Analog Input

12 channels in total,
both resistance and voltage type

Frequency input

Total 12 channels,
signal level amplitude 0~5VDC

Switching inputs

A total of 13 channels,
high level active and low
level active types

Drive outputs

Total 26 channels,
four types of low-side drive,
high-side drive, full-bridge drive,
current drive

CAN communication

Total 3 channels,
CAN2.0 A/B,
up to 500 kbit/s
(software configuration)
